Project numbers

- **EU contribution** € 4 991 205
- Grant agreement ID: 101086421
- 14 Participants
- **Funded under:** Food, Bioeconomy Natural Resources, Agriculture and Environment
- HORIZON-CL6-2022-GOVERNANCE-01-08 - Uptake and validation of citizen observations to complement authoritative measurement within the urban environment and boost related citizen engagement
- **Start date** 1 January 2023
 - the project has not started yet
- **End date** 31 December 2026
 - 48 months

Universiteit
Leiden

AirSentinels

Theme

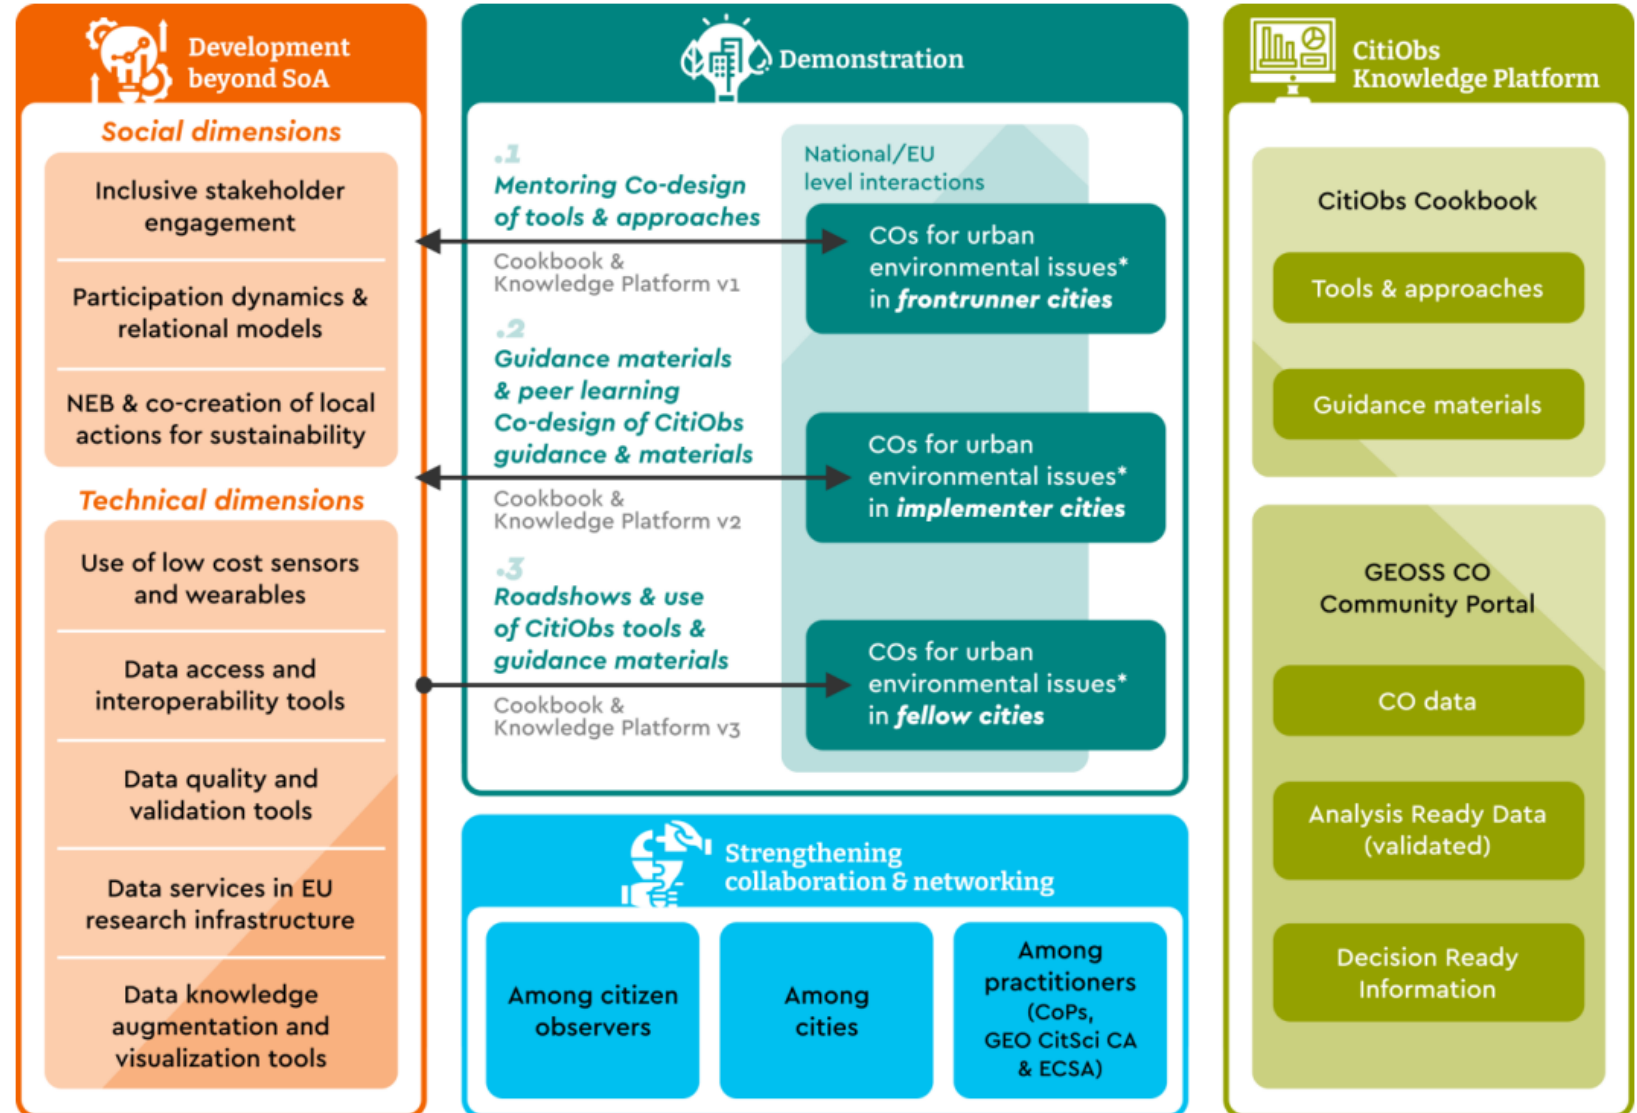

- **Air quality** is the central theme of the COs engaged in CitiObs
- Sensors and wearables offer great opportunities for citizen participation in environmental monitoring;
 - they suffer from lower data quality than equipment used in authoritative monitoring.
- CitiObs will provide a novel validation approach based on
 - automated remote validation using artificial intelligence (e.g. using redundancy approach) and
 - user annotation of significant events (e.g. malfunction).

Methodology

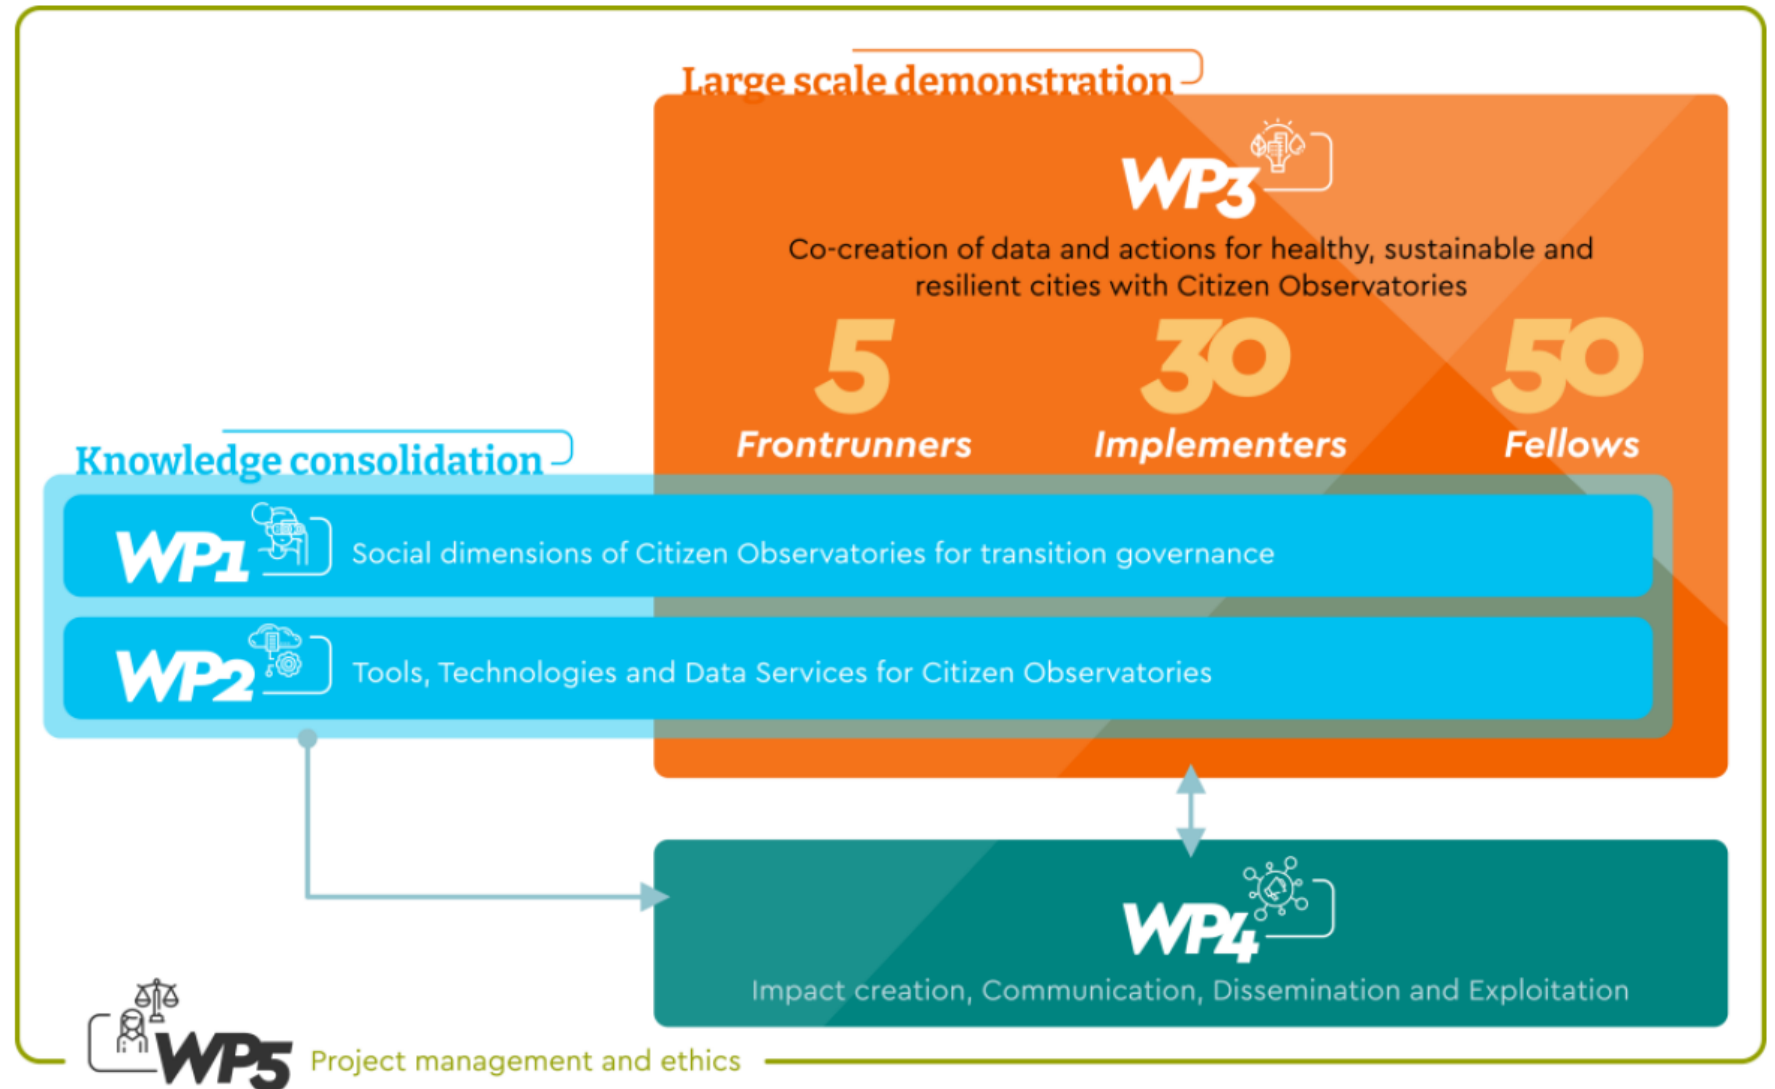

- **Dimensions:**
 - Social (co-creation)
 - Technical (interoperability)
- **Demonstrations**
 - In cities
 - In phases
- **Collaboration**
 - CoPs, GEO CitSci
- **Sharing Knowledge**
 - Cookbook
 - GEOSS CitSci Community portal

I do not want to show a WP diagram

- How many cities the project will directly involve in 3 phases

Cities involved:

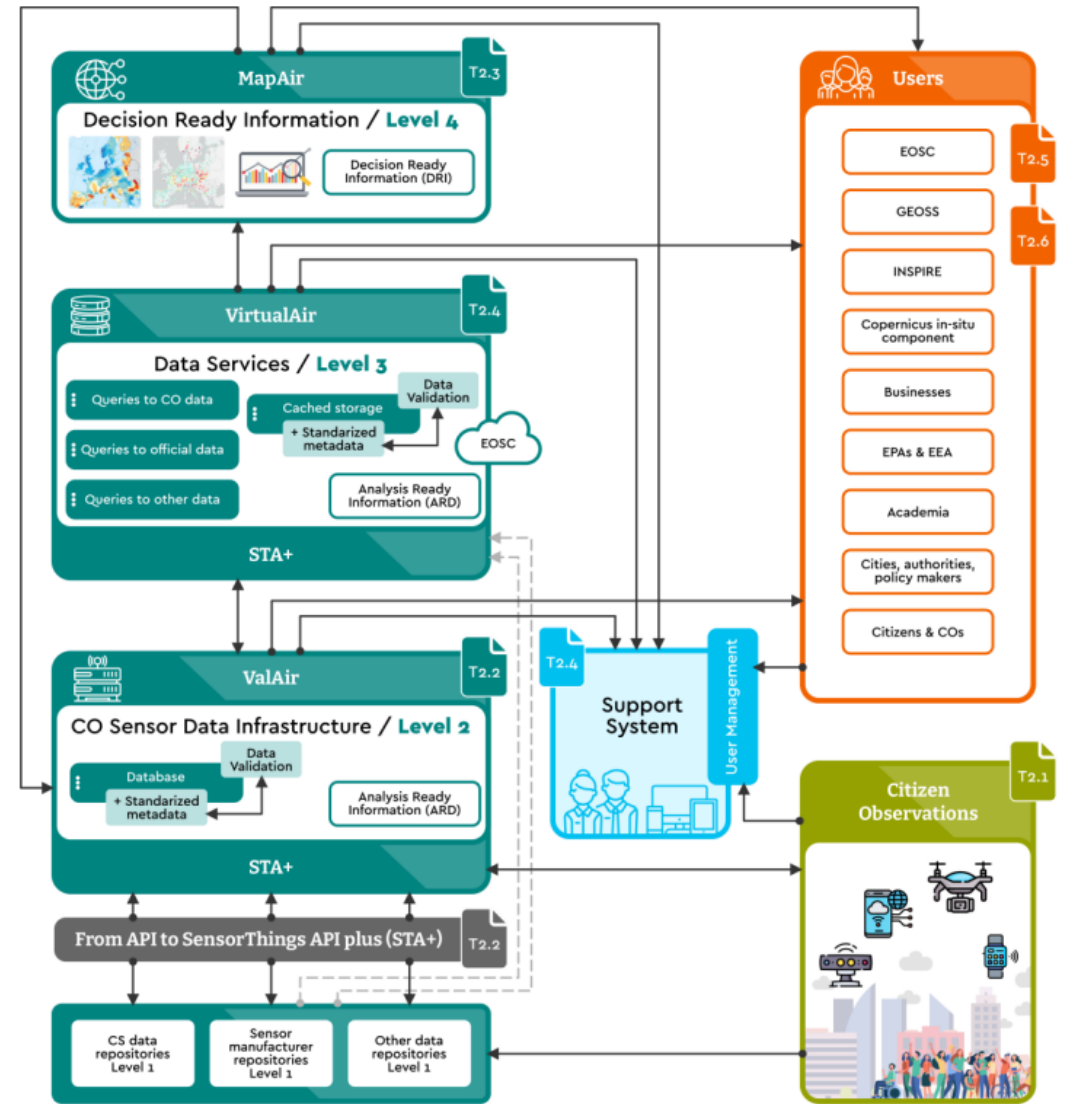

- Frontrunners (Secured) M7-M42
 - Athens (GR), Barcelona (ES), Dublin (IRL), Rotterdam (NL), Kristiansand (NO)
- Implementers (Known) M16-42
 - in Belgium: Mechelen; in Hungary: Budapest (P); in Finland: Lappeenranta (P) and Helsinki (P); in France: Grenoble (P); in Italy: Milan (P); in the Netherlands: Amsterdam (P) and Leiden (I) and Amersfoort (P), Utrecht (P), and Zwolle (P); in Sweden: Gothenburg (I); in Norway: Oslo (P) and Bergen (P); in Poland: Warsaw (P) and Krakow (P); in Portugal: Porto (P); in Romania: Cluj-Napoca (P); in the Ukraine, Kyiv (I) and Lviv (I).
- Fellows (TBD) M30-48
 - 50 cities who will be invited to participate in knowledge sharing and peer learning with the Implementer cities.
 - Fellow cities will be recruited through an open call

An Architecture based on SensorThings API plus (STA+): a Best Practice proposed in the Cos4Cloud and approved by the Open Geospatial Consortium. Tested in:

Cos4Cloud

Not much more to say at this point

Stay tuned
