

## Coupling dynamic cities and climate

Nektarios Chrysoulakis

Remote Sensing Lab, FORTH

Learn more here:

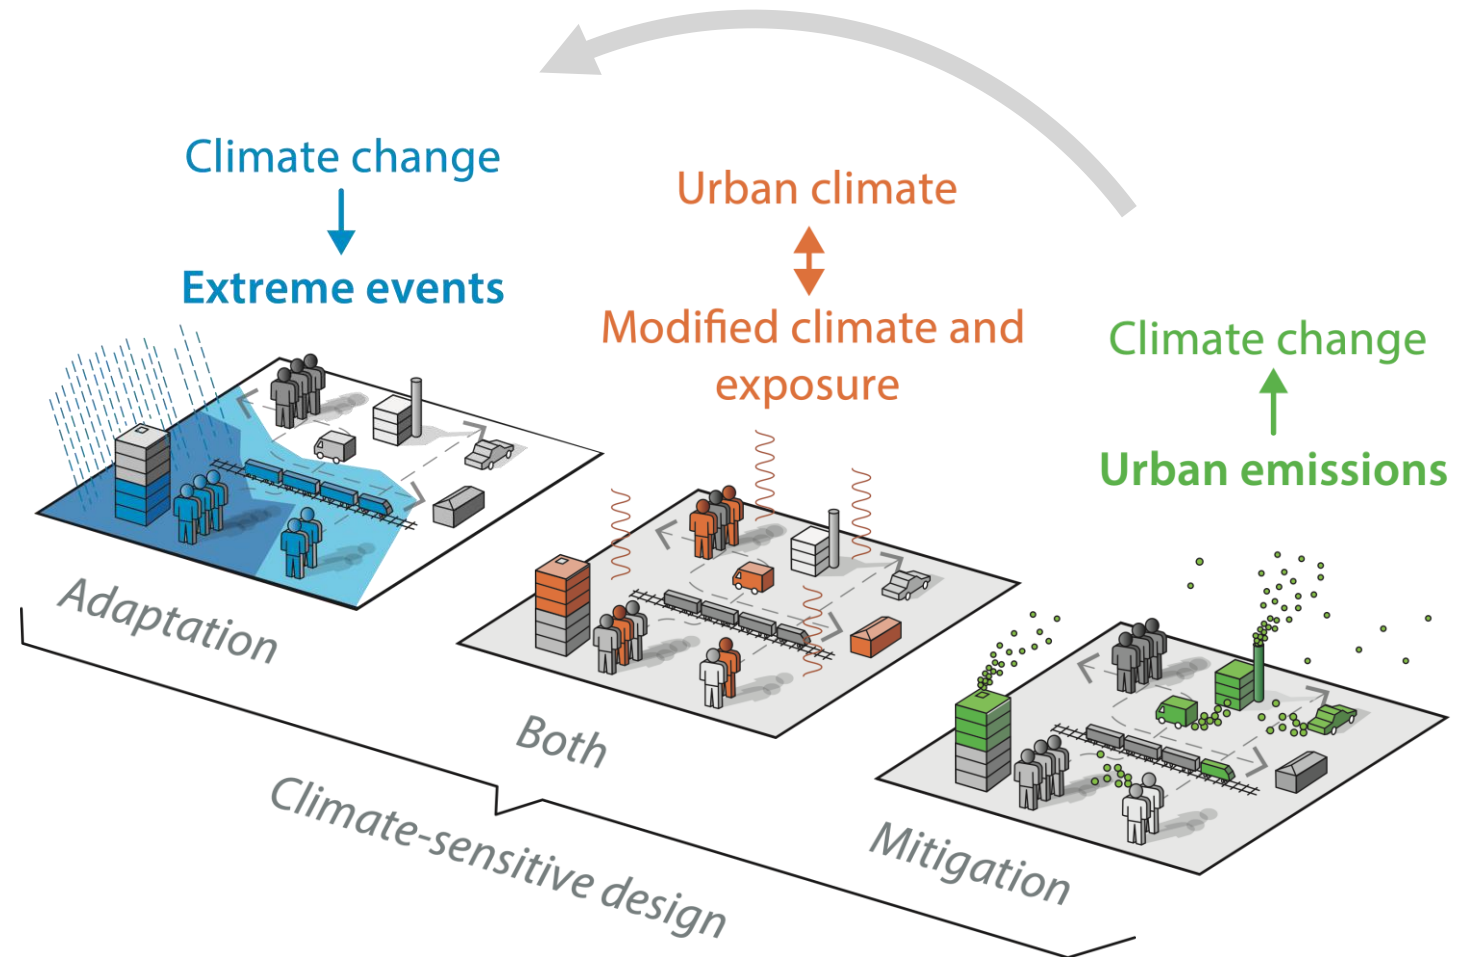

ATHENS 7-9 DECEMBER 2022

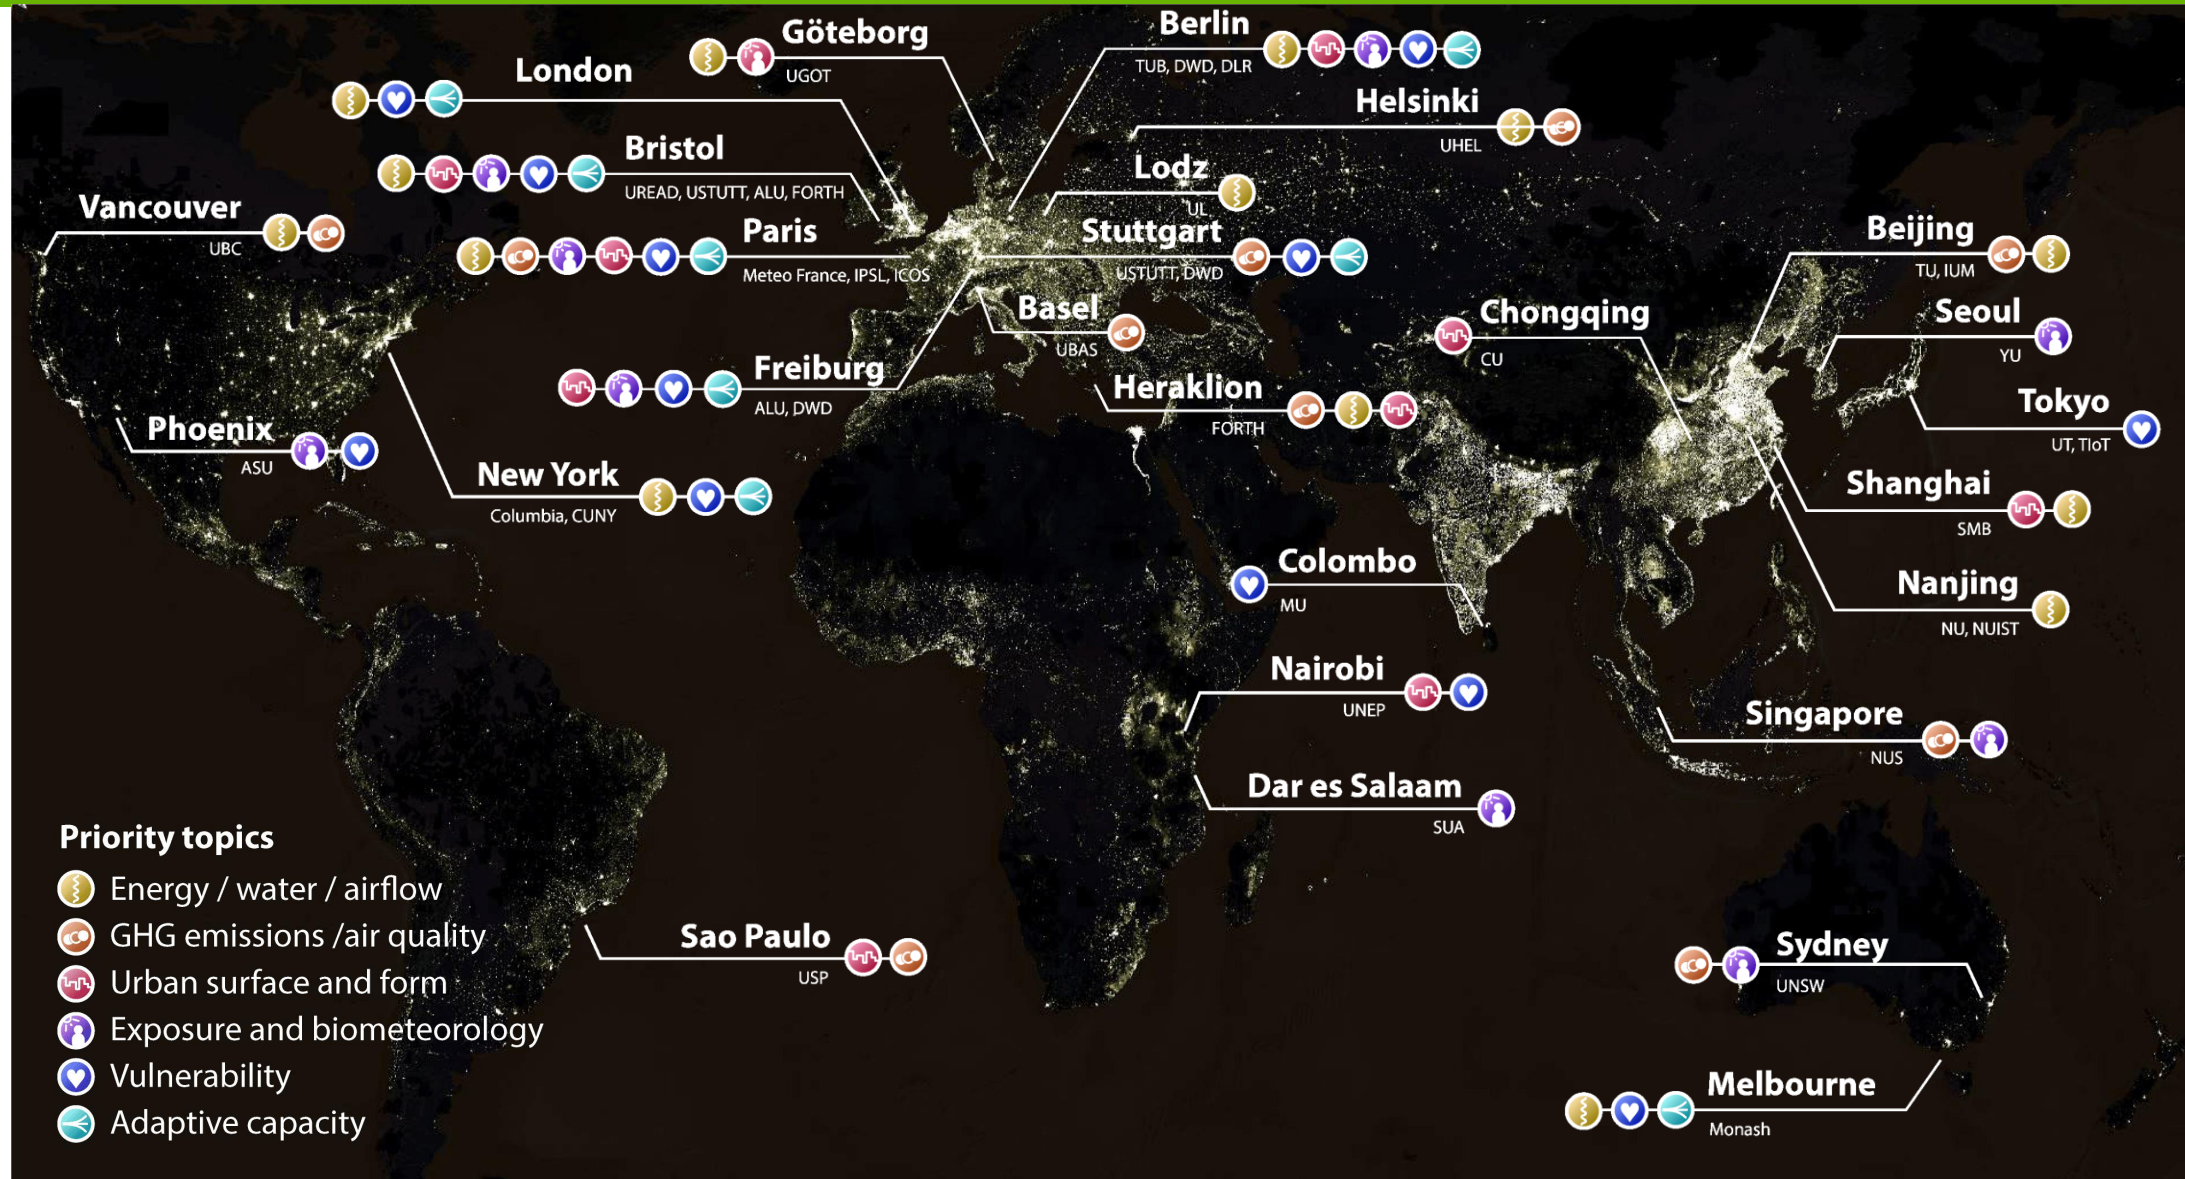

## Objectives

- **Understanding**, forecasting, and projecting feedbacks between climate change and drivers of urban transformation.
- **Exploring** how urbanization, human behaviour and technology changes **impact climate change**; and how impacts of climate change influence urban populations, their **vulnerability** and **adaptive capacity**.
- **Capturing** the complexity of urban dynamics to **change** the way we represent cities in climate models.

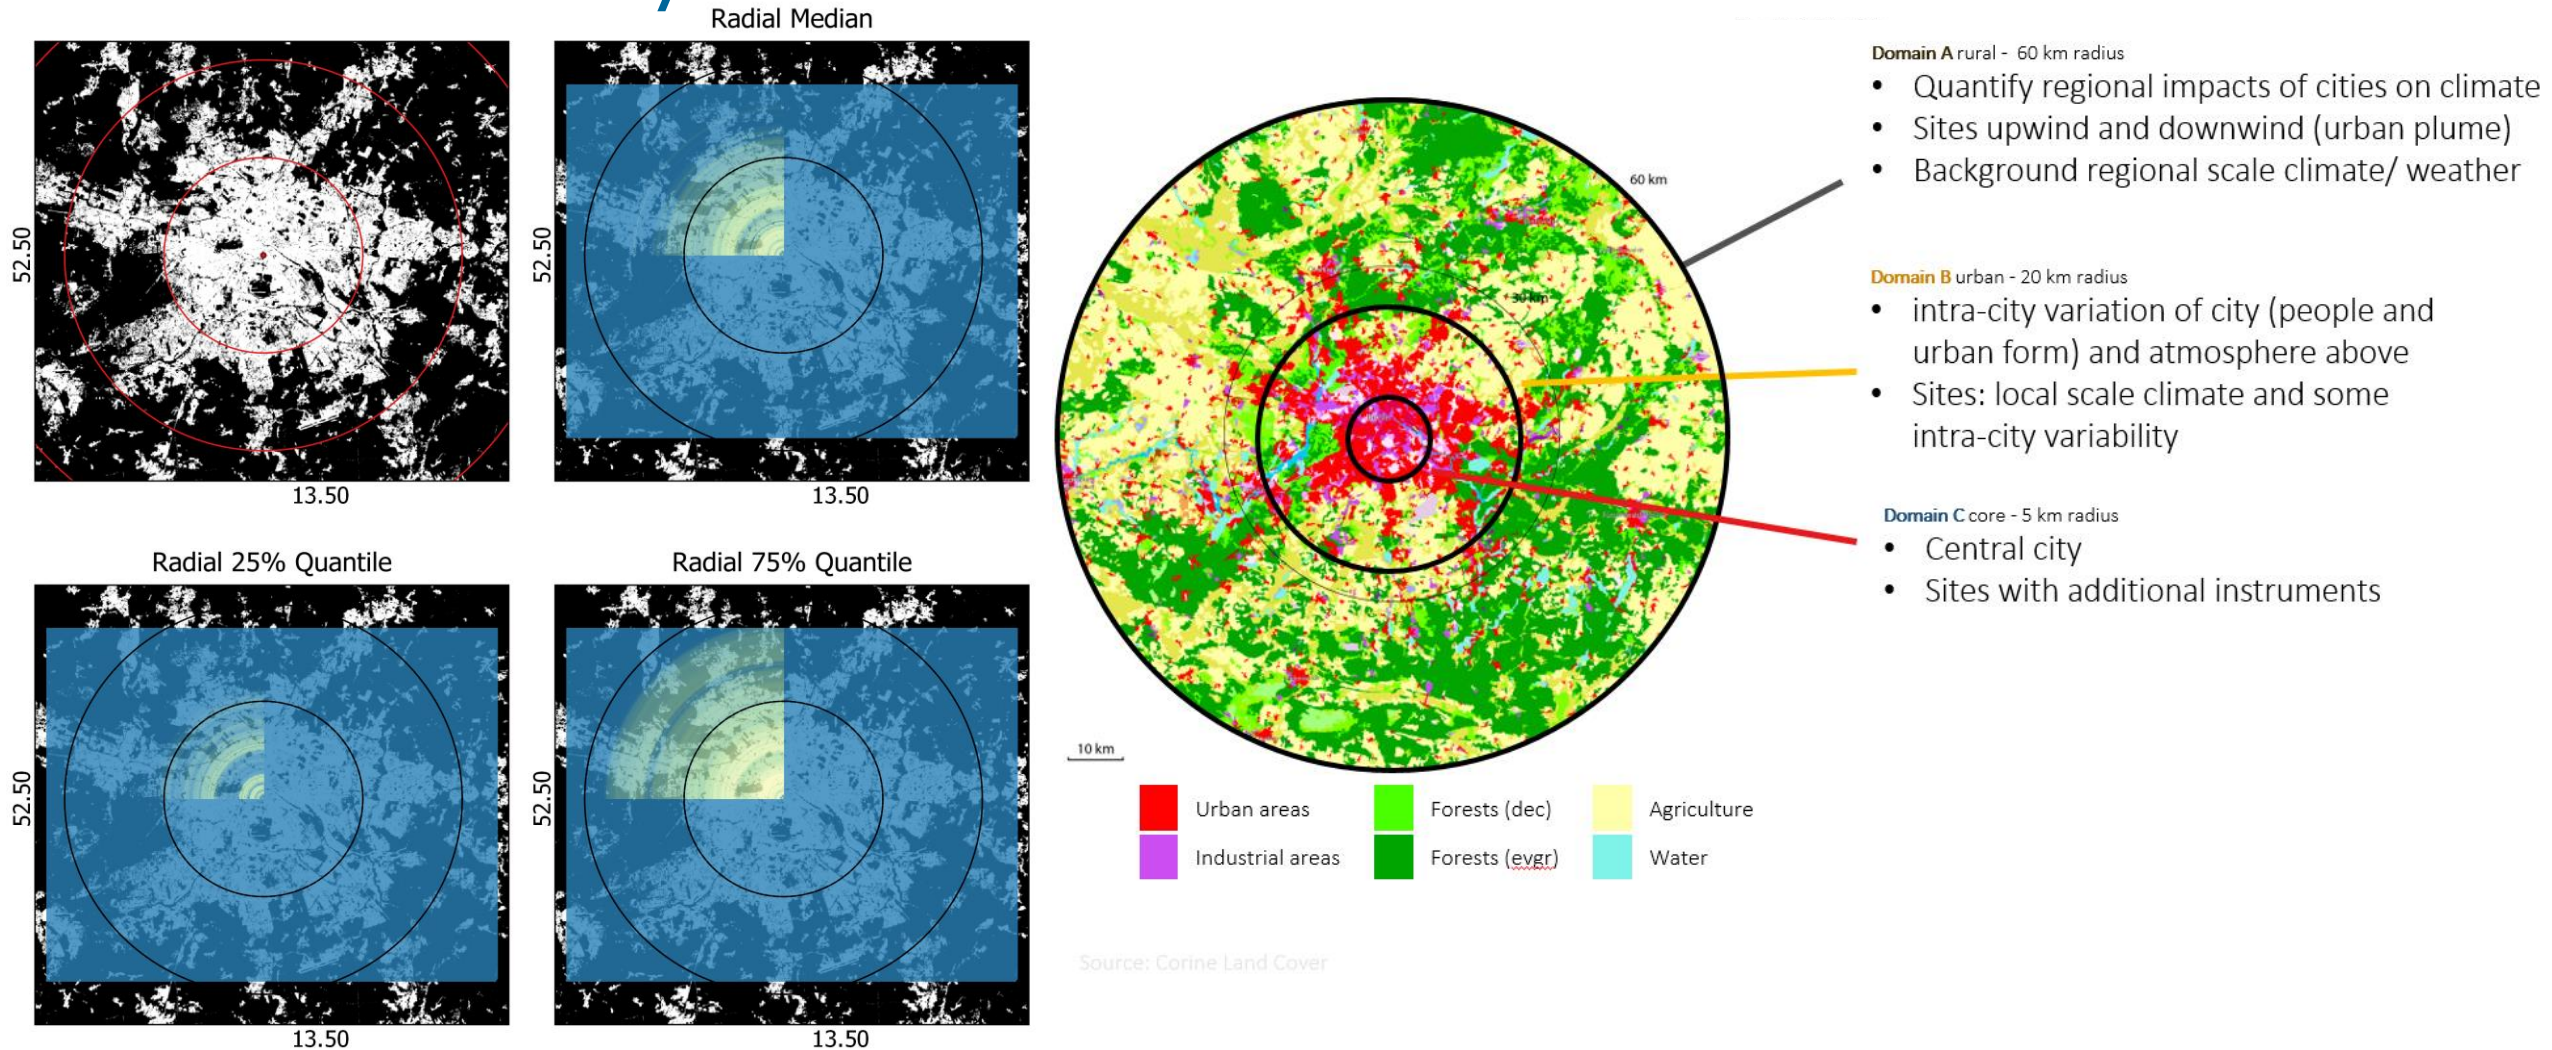

## Case Studies

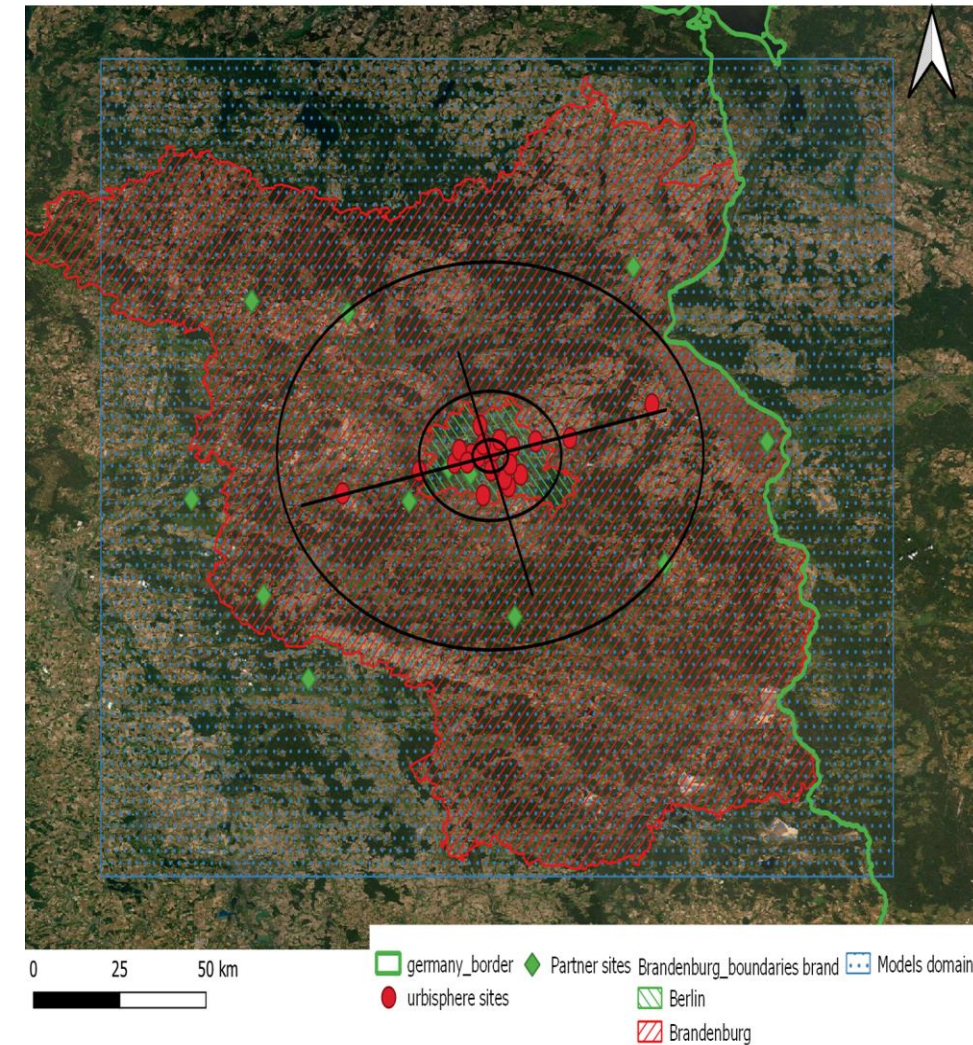

## Where the city's boundaries are?

## ATHENS 7-9 DECEMBER 2022

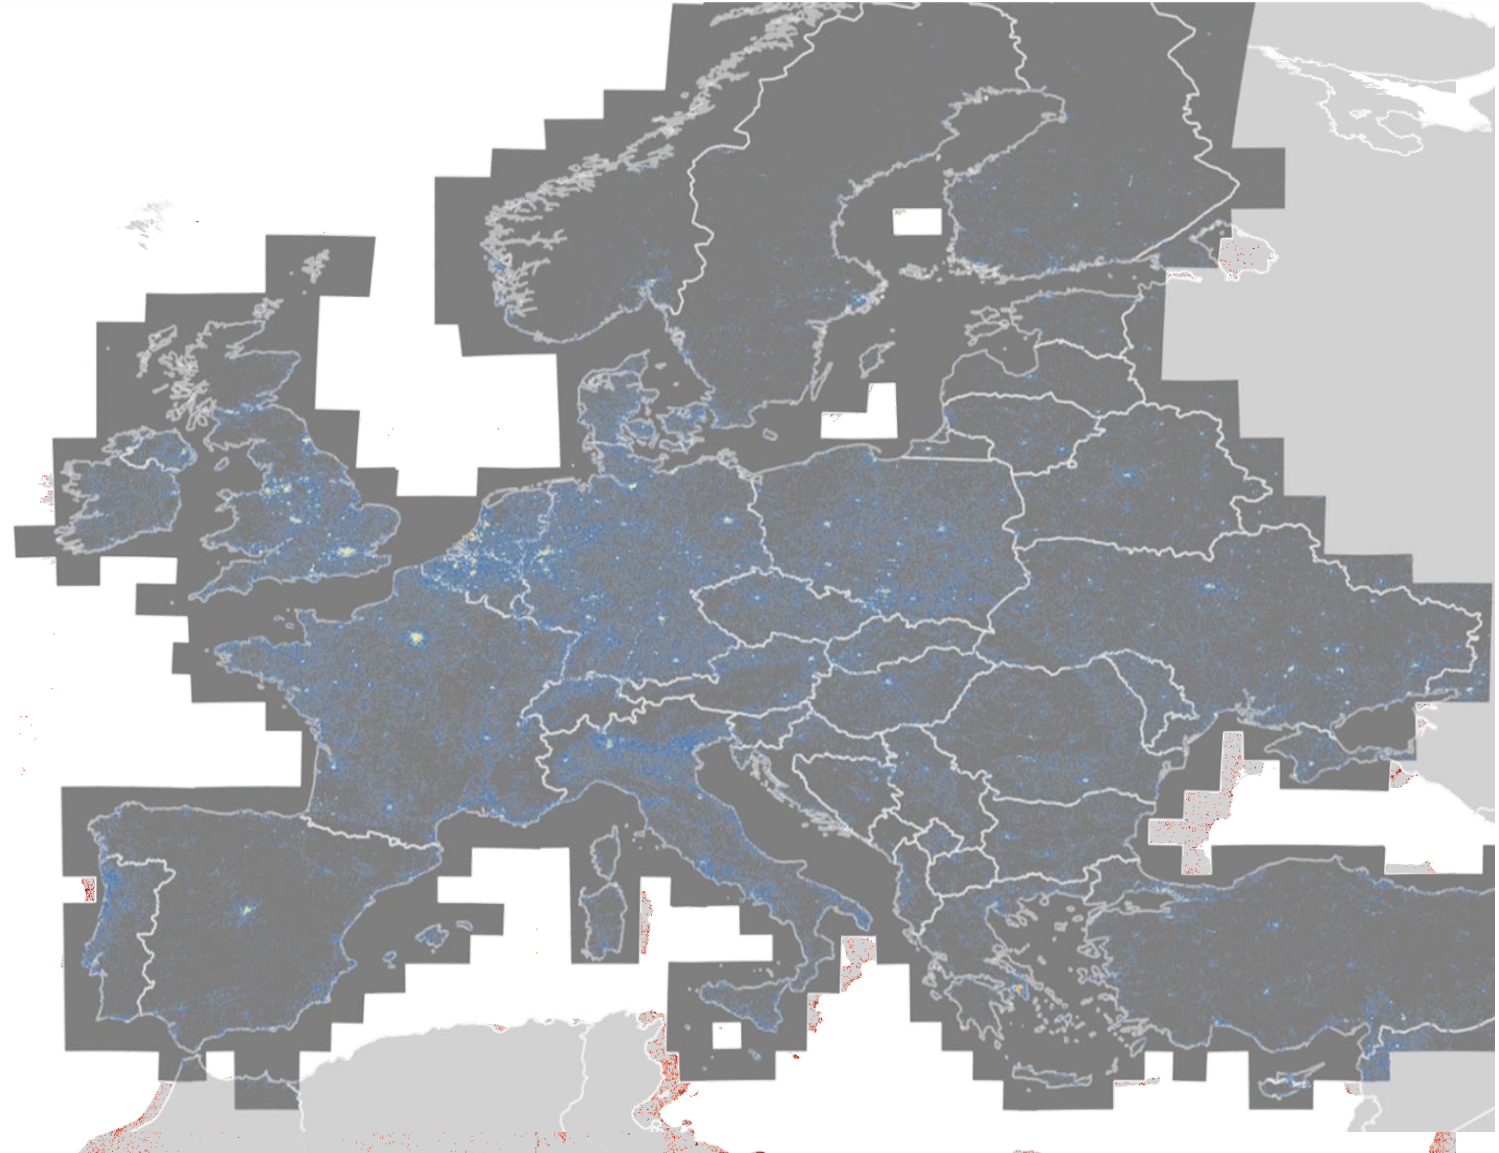

## Modelling

ESA World Cover LC 2020 10m

- ☒ IFS\_grid\_extent
- ☒ Berlin Admin. Polygon
- ☒ domains\_circle
- ☒ domains\_rect
- ☒ um\_grid\_extent
- ☒ AreaOfInterest\_Urbisphere\_Berlin

- 10 - Tree Cover
- 20 - Shrubland
- 30 - Grassland
- 40 - Cropland
- 50 - Built-up
- 60 - Bare / sparse vegetation
- 70 - Snow and Ice
- 80 - Permanent water bodies
- 90 - Herbaceous wetland
- 95 - Mangroves
- 100 - Moss and lichen

## Modelling

- 1 - Paved/Impervious
- 2 - Bare Soil
- 3 - Water
- 4 - Low Vegetation
- 5 - Buildings
- 6 - High Vegetation

Population, activity, policies

Urban form

Urban function

Movement / travel

# EUROGEO WORKSHOP 2022

SmUrObs

## Module A

### Observing Urban Form and Function

- 1 Dynamics of socio-economic and demographic conditions
- 2 Mobility patterns
- 3 Multispectral, hyperspectral and laser-based EO to observe form and function

## Module C

### Observing Urban Exposure

- 1 Wearable sensors
- 2 Indoor-outdoor massive sensor networks
- 3 3D- and satellite thermal remote sensing

## Module B

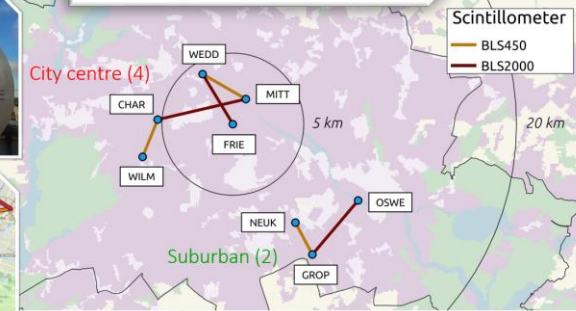

### Observing Urban Emissions

- 1 Flux towers to measure E/W/C/AQ emissions
- 2 Concentration and isotope measurements on ground, in atmosphere and from satellites
- 3 Wind LIDARS / ALC, Scintillometry

## Module D

### Integration

Calibration  
Real-time communication  
Storage and database

## Scenario analysis: Aging, Heat Stress and Planning

Iqbal et al. 2022

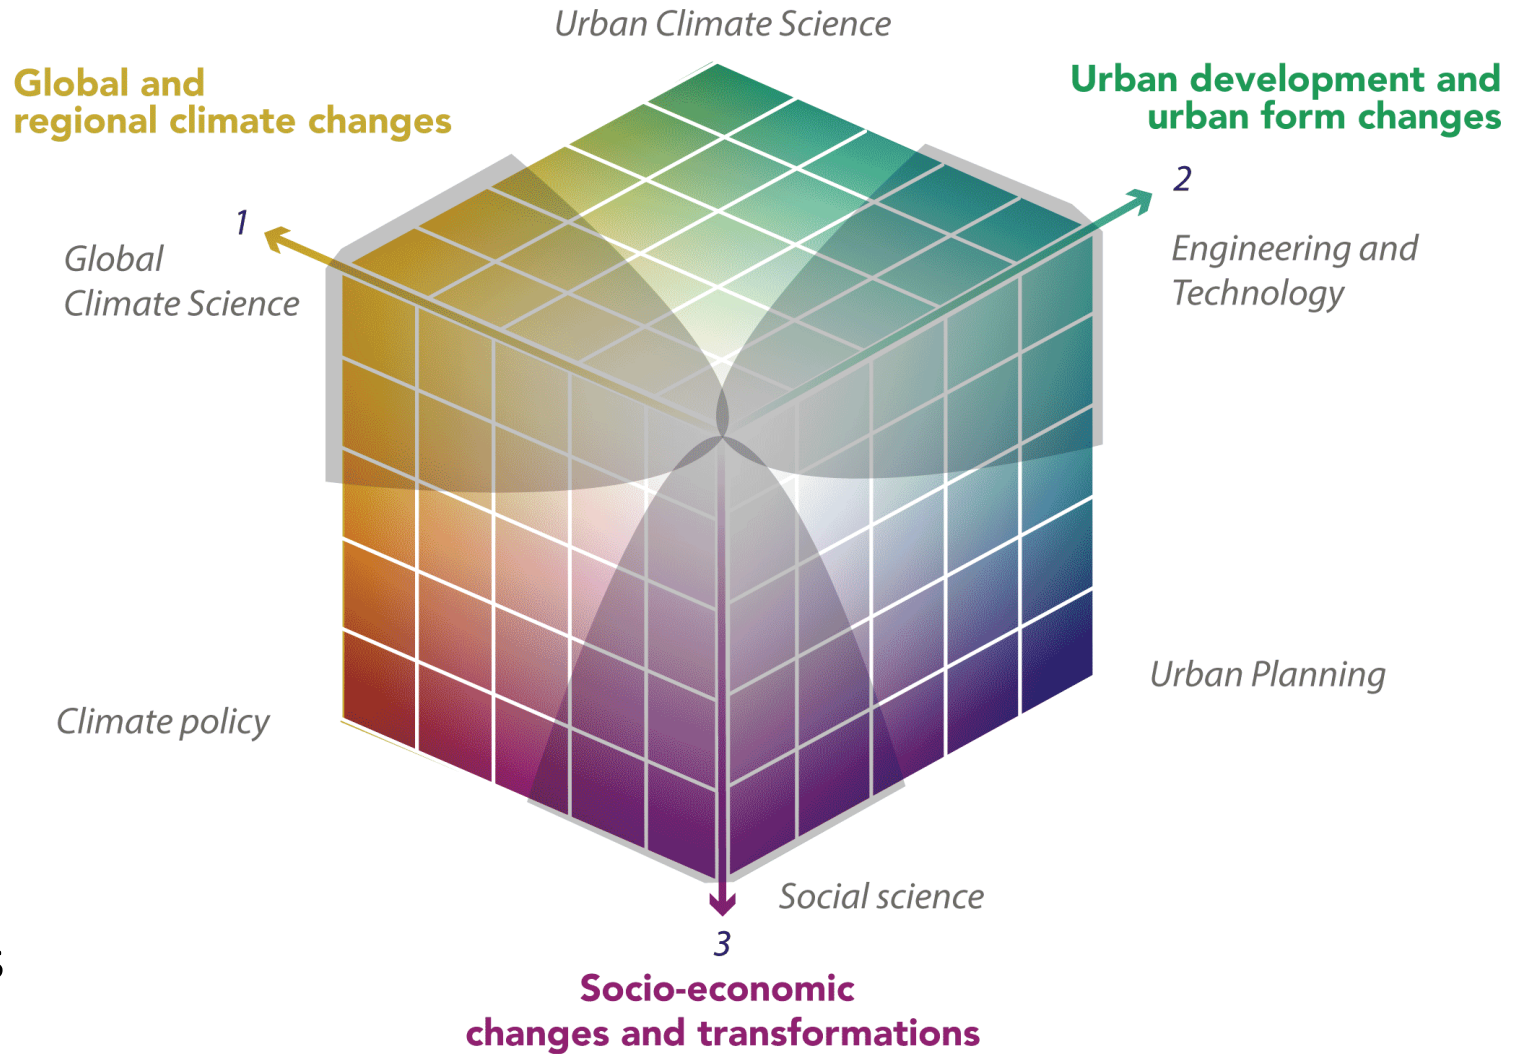

## Main Outcomes

- **Deeper understanding** of socio-economic dynamics and human responses to climate, extreme events and urban transformation.
- **UDAs** that link different **neighbourhoods** considering **vulnerability, function and form**; and reacting to changes in urban development, socio-economic change and climate change.
- **Evaluated scenarios** of vulnerability, adaptive capacity and emerging risks from neighborhoods to **global cities**.
