## Support to GWP activities - survey

## Support to GWP activities – engagement calls

- Inventory of data needs, especially **in situ** (unavailable data, restrictions, formats, accessibility) and key networks with which to engage.
- Understanding of awareness about the **Data Sharing and Data Management Principles** and the support needed for their implementation.
- Understanding of the **law and policy** about data used by the activities
- Gathering feedback about the infrastructure needs for the enhancement of the **GEOSS Platform**

## Next steps

- Analysis of findings, including key networks and datasets
- Technical support (data sharing and data management implementation)
- Awareness raising to Member States: “What does it mean to be a GEO Member?”

**2023 technical event on Open Data and Open Knowledge,  
linking data providers and users.**
